

## SYGEJOURNAL

Sow ID:

Reason for sick pen:

Date for moving to sick pen:

| Date | Diagnosis | Treatment | Amount x number of days | Temperature |
|------|-----------|-----------|-------------------------|-------------|
|      |           |           |                         |             |
|      |           |           |                         |             |
|      |           |           |                         |             |

### Evaluation of the sow after finishing the treatment:

- If the sow is all healthy again – move the sow out of the sick pen to make room for other sick animals.
- If the sow is better, but still not all healthy, the same treatment can only be repeated after instructions from the veterinarian.
- If the sow is not better after finishing the first treatment, a new treatment strategy can begin after instructions from the veterinarian or the animal needs to be euthanized/killed.

### Veterinarian evaluation:

- Date

### Where is the sow going after hospital box?
